PROFESSIONAL SUMMARY

Mobile App Developer with 4+ years' experience designing, developing and shipping cross-platform apps using Flutter and React Native. Extensive expertise in Dart, TypeScript, Redux, and Node.js. Proven track record of architecting scalable mobile solutions and improving app performance (e.g. reduced load times by 40%). Strong collaborator, having led Agile teams and mentored junior developers. Seeking to leverage full-stack mobile skills (including backend APIs in Node.js) to drive high-impact projects.

TECHNICAL SKILLS

Languages: Dart (Flutter), JavaScript/TypeScript (React Native, Node.js)

Mobile Frameworks: Flutter, React Native, Android, iOS

State Management: Riverpod 2, BLoC/Cubit (Flutter) and Redux Toolkit, Zustand, TanStack Query (React)

Navigation & UI: go_router, auto_route (Flutter) and React Navigation (or Expo Router), Material 3, Cupertino widgets, Reanimated 3, Gesture Handler

APIs & Backend: RESTful APIs, GraphQL; Node.js (Express), Firebase, Supabase

Testing & CI/CD: flutter_test, integration_test, Jest (RN Testing Library), Detox, App Store Connect, Google Play Console, Codemagic/Fastlane

Dev Tools & Practices: Git/GitHub, Agile/Scrum, SOLID principles, performance profiling tools

PROFESSIONAL EXPERIENCE

MOBILE APP DEVELOPER

Acelucid Technologies Pvt. Ltd. | Uttarakhand, India

Nov 2022 – Jan 2026

- Built and maintained scalable Flutter and React Native applications using Clean Architecture, MVVM, SOLID principles, and modular design patterns.
- Improved application performance by approximately 30% by optimizing state management, rendering, image caching, and overall code efficiency.
- Created reusable components and structured project modules to make applications easier to maintain and extend.
- Integrated Stripe and Razorpay payment gateways, handling payment flows and transaction-related requirements.
- Implemented Firebase Cloud Messaging (FCM), OneSignal, deep linking, authentication, analytics, and crash reporting across mobile applications.
- Set up and maintained Fastlane pipelines for Android and iOS, reducing manual release work and making deployments more consistent.
- Managed Google Play Store and Apple App Store releases, including signing configurations, build preparation, compliance requirements, and production deployments.
- Introduced SonarQube into the development workflow to improve code quality and identify maintainability issues early.
- Worked closely with Product Managers, Backend Engineers, QA Engineers, and Designers to build and deliver production-ready mobile features.
- Contributed to architecture discussions, technical planning, sprint estimation, and code reviews, helping the team make practical technical decisions.

REACT NATIVE DEVELOPER

CFCS Cloud Solutions | Noida, India

Feb 2022 – Oct 2022

- Developed scalable React Native applications using TypeScript, focusing on clean, reusable, and maintainable code.
- Used Redux Toolkit for predictable state management across application features and user flows.
- Integrated REST APIs, authentication flows, and secure token management for reliable communication with backend services.
- Improved UI responsiveness and application performance by optimizing rendering and building reusable components.

KEY PROJECTS

Sole - Accounting & Invoicing Platform || [Play Store](#) | [App Store](#)

- Built core accounting and invoicing workflows, including invoices, quotes, recurring invoices, payments, expenses, receipts, and payment tracking.
- Implemented authentication, secure data handling, push notifications, MixPanel, and third-party service integrations across the application.
- Optimized application performance, UI responsiveness, and state management across key accounting and invoicing screens.

Technologies: Flutter, Dart, Cubit, Clean Architecture, Modular Architecture, REST APIs, Firebase, Push Notifications, MixPanel, Authentication, Payment Integration, State Management, Reusable Components, API Integration, Performance Optimization, Shorebird

Recipe Cup - Multi-Vendor Food Ordering Platform || [Play Store](#) | [App Store](#)

- Developed React Native applications using TypeScript and Redux Toolkit.
- Built authentication, cart management, order lifecycle, payment integration, and live order tracking.
- Integrated Firebase services, push notifications, and REST APIs.
- Developed responsive UI using NativeWind.
- Managed CodePush updates and App Store deployments.

Technologies: React Native, TypeScript, Redux Toolkit, NativeWind, Firebase, REST APIs, JWT Authentication, Push Notifications, Real-Time Updates, CodePush, App Store Deployment

AWARDS & RECOGNITION

ACE Trailblazer Award | Acelucid Technologies Pvt. Ltd. | December 2024

Awarded for introducing engineering improvements, taking ownership of critical initiatives, and setting practices that enhanced the team's mobile development workflow.

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

Shivalik College of Engineering, Uttarakhand Technical University
2018 – 2022
